COMPANY BACKGROUND

LIFE. LUXURY. MARVEL.

For over 70 years, Marvel has been committed to enhancing the lifestyle of its customers. Today, with its unparalleled line of luxury undercounter refrigeration products, Marvel is an industry leader in style, design and sheer range of choices for the discriminating homeowner. As an Aga Company (Aga is United Kingdom's leading cooking equipment supplier for both commercial and residential markets), Marvel is poised to provide exciting refrigeration solutions on a truly global scale.

Founded in 1932 by Carl J. Wagner, Marvel began its journey creating undercounter ice boxes for the camper craze that was then sweeping the nation. Electric refrigeration soon followed and with that, a new product category was born. Marvel's growth throughout the decades has always been lifestyle-driven and the company has pioneered many important firsts on its path to becoming a major industry player in the luxury refrigeration market. Marvel was the *first* to introduce a high-end undercounter wine storage model, and the first to re-define luxury refrigeration with its breakthrough introduction of the all-black interior—freeing homeowners from the monotony of *appliance white*.

With the widespread growth of both “satellite kitchens” and outdoor entertaining, Marvel products provide the stylish accent—and dependable performance—that these luxury applications demand. Marvel undercounter wine storage and beverage refrigerators feature forced-air ventilation and quiet, powerful compressors with microprocessor controlled thermostats. With the ability to complement any décor, Marvel products are available in stunning designs, including sleek stainless steel, monochromatic color choices and *overlay* doors that precisely match surrounding cabinetry.

In addition to providing luxury undercounter refrigeration for the home, Marvel also supplies refrigerators for military and industrial applications. In fact, Marvel's luxury consumer models are built and tested with the same high standards as the military and industrial line. That is why each model is backed by Marvel's ironclad warranty.

Today, Marvel is proud to capitalize upon its innovative history to provide an unwavering commitment to its customers. For their uncompromised quality, breathtaking array of design choices, and sheer luxury performance, Marvel—and Marvel products—remain at the forefront of the industry, a legacy that started with a simple ice box and continues with lifestyle-enhancing, luxury refrigeration for the home.
