Marvel Refrigerated Drawers Go High-Tech

Exclusive Sentry System™ Refrigeration Monitor for Drawer Line Launched

RICHMOND, IN – Marvel continues its tradition as a leader in innovative refrigeration trends by announcing the addition of the exclusive **Sentry System™ refrigeration monitor** to the popular undercounter refrigerated drawer models.

“With the launch of our undercounter refrigeration drawer line in 2005 we pioneered a trend that has since become very popular. But in that time, the market has grown and the consumer has become more discerning. The development and implementation of our *Sentry System™* refrigeration monitor once again sets us apart as the industry leader,” said Gerry Reda, Senior Vice President of Sales for the Aga Group Companies.

The *Sentry System™* refrigeration monitor, which operates in real time to actively maintain optimal conditions, will be a standard feature on both the 24-inch and 30-inch models. The system uses intuitive technology to monitor critical components like drawer ajar, power failure or temperature change, and announces them with both an audible alarm and a visual alert in the message center.

In addition, the system features a user-activated Sabbath mode. When in this mode, all lights, alarms and LED displays are deactivated for 36 hours. In addition, the system randomly engages the compressor to prevent it from starting when a drawer is opened or temperature setting is changed.

The line will still be equipped with its previous standard features. The 304-grade stainless steel drawer interiors are both elegant and durable. Top and bottom glide-out drawers on telescoping slides allow full extension and easy access. Discreet electronic keypad/LED temperature display offers precise temperature control. Clean, bright, low-voltage interior lighting ingeniously projects light downward into the drawers’ interiors. And the full-depth bottom drawer provides unobstructed storage (the only drawers on the market today that can accommodate two-liter and opened wine bottles, vertically).

The *Marvel Sentry System™* refrigeration monitor will be available on 24-inch and 30-inch undercounter refrigerated drawer models beginning June 2007 through their network of nearly 700 dealers nationwide. For complete information regarding this model, or to locate a Marvel distributor near you, visit www.lifeluxurymarvel.com or contact Marvel at 800-428-6644.

About Marvel

Marvel Industries, an Aga Group Company, is a leading manufacturer of indoor and outdoor undercounter refrigeration products, including wine cellars, beverage refrigerators, refrigerated drawers, ice machines and beer dispensers.
