AGA MARVEL RECEIVES ISO 9001 AND 14001 ACCREDITATION

March 8th, 2010

We are pleased to announce that our AGA MARVEL Greenville facility has gained accreditation to both ISO 9001 and 14001 standards.

The accreditation to these standards confirms our quality and environmental systems meet the rigor of the international standard. In commenting on the accreditation AGA Rangemaster Group plc Group Operations Director Gary Green said "These designations are a credit to the strength of the AGA MARVEL Team having achieved these designations and opening a state of the art manufacturing facility in the span of less than a year." Both standards underpin the AGA Rangemaster Group's commitment to continuous improvement, at the workplace, in development of our products, our customer relationships and to the broader environment of which we are a part.

About AGA MARVEL:
